Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1 and 3 are rejected under 35 U.S.C. 102(e) as being anticipated by Drevik, Solgun (WO 99/25282).

Drevik discloses an absorbent article 1, as shown in figure 1, comprising a front portion 10, a rear portion 11, a liquid permeable top sheet 2, a liquid impermeable backing sheet 3, and an absorbent body 5. The rear portion 11 includes a longitudinally extending ridge-shaped elevation 15, as shown in figure 3. A central string of material 18 extends in the rear portion 11, as shown in figure 4C, and is enclosed between the top sheet 2, backing sheet 3, and absorbent body 5.

With respect to claim 3, the portions of the article 1 that extend around the string of material 18, the top sheet 2 and backing sheet 3, are fastened to each other around sides 17, as shown in figure 4C.

Allowable Subject Matter

Claims 2 and 4-7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: The prior art of record fails to disclose the longitudinally extending strip of flexible material being fastened to the backing sheet on the outer, or distal, side. Nothing in the prior art of record anticipates or clearly suggests fastening the longitudinally extending strip of flexible material in this configuration.

Claims 8-12 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose the step of forming the strip of material into a longitudinally extending string after fastening the strip to the composite. Nothing in the prior art of record anticipates or clearly suggests forming the strip of material into a string after is has been fastened to the composite.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3761

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. U.S. Patents 6,350,257; 5,672,165; and 4,673,403 pertain to absorbent articles having a longitudinally extending ridge-shaped elevation.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to C. Lynne Anderson whose telephone number is (703) 306-5716. The examiner can normally be reached on Monday through Friday.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, John Calvert can be reached on (703) 305-1025. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
